EXAMINER

TYLER, STEPHANIE E

ART UNIT

PAPER NUMBER

3754

MAIL DATE

DELIVERY MODE

12/08/2008

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/527,197	Applicant(s) PARDONGE, JEAN-MARC	
	Examiner STEPHANIE E. TYLER	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 September 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 and 20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 20 is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Upon further review of the claims, Examiner has withdrawn claims 1-18 as being allowable (as previously presented) based on further consideration of prior art and claim language. Examiner apologizes for any inconvenience this may caused the Applicant.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, there appears double inclusion and/or conflict of lines 5 and 6, stating “the valve member made in part of a thermally-conductive material” and; lines 6 and 7, stating “and an outer portion (of the valve member), extending, at least in part, outside the valve body, and made of a second material that is thermally conductive”.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3754

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1,2,8,13-15,18 are rejected under 35 U.S.C. 102(b) as being anticipated by Diesing (3,075,542).

The Diesing reference discloses a fluid dispensing valve (where the fluid is air, 1) having a valve body (7), a valve member (2,6) which is a temperature regulator means consisting of an inner portion (6) that is slidable inside the valve body between a rest position (vice versa of dispensing position) and a dispensing position (see fig.1); and an outer portion (2) extending, at least in part, outside the valve body (7); and wherein the inner portion (6) is made, at least in part, of a synthetic material (col.1, lines 41-43) and the outer portion (2) is made, at least in part, of a second material that is thermally conductive (2, see cross-hatch in fig.1); and wherein the inner and outer portions are secured to each other (by element 9); and wherein the temperature regulator means (2,6) has a head (lower cylindrical portion of 2) being made of a thermally-conductive material; and wherein the thermally-conductive material is a metal; and wherein the fluid dispenser device includes a fluid reservoir (fig.1; space between 1 and 7); and wherein the dispenser head (lower cylindrical portion of 2) mounted on the valve member (2,6) of the valve (1); and wherein the dispenser head (lower cylindrical portion of 2) includes the temperature regulator means (2,6); and a portion of the dispenser head that co-operates with the valve member (2,6) includes the temperature regulator means.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Diesing (3,075,542).

The thermally-conductive material of the valve body being aluminum is a design choice based upon the needs of the consumer/manufacturer that will be operating fluid dispensing valve. Whether the thermally-conductive material is aluminum or another type of metal, it would not affect the utility of the fluid dispensing valve device.

Therefore having a particular type of thermally conductive material fails to be patentably define over the prior art.

Allowable Subject Matter

7. Claim 20 is allowed.

8. Claims 3-7,9-12,16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Upon further review of claim 1, 112 6th paragraph has not been evoked because claim 1 actually defines what the temperature regulator means is. Claim 1 defines the temperature regulator means as being the valve member. Therefore this changes the limitation of claim 1 and prior art was applied.

9. Applicant's arguments with respect to claims 1-18,20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEPHANIE E. TYLER whose telephone number is (571)272-8059. The examiner can normally be reached on 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
